Mikhail Razakov

.NET Backend Engineer · State Correctness & Recovery

misha13022008@gmail.com
t.me/Micodiy
github.com/Misha1302

Backend engineering focused on state invariants, idempotent recovery, and verifiable releases—not a separate SRE claim, but developer ownership of service behavior after failures.

State invariants
subscriptions, payments, balances, devices

Fail-safe recovery
outbox, audit trails, reconciliation

Verifiable releases
backup/restore, health gates, rollback

EXPERIENCE

2026 — PRESENT

VpnMediator

- Payment state machines, access lifecycle, audit, and background recovery.
- Versioned deployments, diagnostics, backup/restore, and rollback.

2026 — PRESENT

CompilationLabLMS

- Balance ledger, verified webhooks, idempotent payment completion, and critical-flow checks.

SELECTED PROJECTS

Wist runtime contracts

Fail-closed policies, per-session ownership, and exact manifest identity.

Client licensing API

Explicit activation states and operator-safe admin scenarios.

Release discipline

Clean artifacts, manifests, consumer smokes, and rollback gates.

SKILLS

State correctness
state machines, invariants, idempotency, transactions

Recovery
outbox, reconciliation, audit trails, restart safety

Release
migrations, backup/restore, health gates, versioning

Stack
C#/.NET, PostgreSQL, SQLite, Docker, nginx, systemd

EDUCATION

Software Engineering student at HSE University

RECOGNITION

Ranked 1st of 49 in MCST technical selection; Baltic Grand Prize.

TECHNICAL COMMUNICATION

Runbook documentation, readiness criteria, and incident analysis.

AVAILABILITY

Moscow / remote · up to 20 hours/week from September 2026
