

I design .NET services with explicit state models: subscriptions, payments, roles, devices, migrations, recovery, health gates, and safe releases.

2 services + 1 client system

VPN, LMS, and licensing API

Payments & recovery

idempotency, outbox, audit trails, reconciliation

ASP.NET · PostgreSQL · Linux

APIs, data, deployment, rollback

EXPERIENCE

- 2026 — PRESENT

VPN and LMS

 - Subscriptions, roles, balances, payments, webhooks, and device state.
 - Docker/nginx/systemd, migrations, backup/restore, health checks, and rollback.
- 2023

Client licensing backend

 - Activation lifecycle, OpenAPI contract, explicit errors, and admin workflows.

SELECTED PROJECTS

- VpnMediator**

Commercial subscription backend with payments, devices, and recovery.
- CompilationLabLMS**

Roles, learning workflows, a balance ledger, and payment operations.
- Wist**

Typed .NET API and package/runtime contract discipline.

SKILLS

- Backend**

C#, .NET, ASP.NET Core, REST, OpenAPI, webhooks
- Data**

PostgreSQL, SQLite, migrations, transactions
- Reliability**

idempotency, outbox, audit, recovery, backup/restore
- Operations**

Docker Compose, nginx, systemd, health gates, rollback

EDUCATION

Software Engineering student at HSE University

RECOGNITION

Ranked 1st of 49 in MCST technical selection; Baltic Grand Prize.

TECHNICAL COMMUNICATION

About 50 students; code review and technical documentation.

AVAILABILITY

Moscow / remote · up to 20 hours/week from September 2026
