

I build and support .NET services where state correctness and recovery matter: subscriptions, payments, roles, devices, OpenAPI contracts, migrations and background operations. In 2023, I delivered a client licensing backend; in 2026, I am developing a VPN service and an LMS. I have taught programming and reviewed student code since 2021.

1/49

MCST technical selection; 104/104 tests

3 production cases

VPN service, LMS and activation system

C# · .NET · SQL

ASP.NET Core, PostgreSQL, Linux operations

EXPERIENCE

- 2026 — present

Independent product development and operations

VpnMediator / Razaltush VPN · CompilationLabLMS

 - Designed subscriptions, access rights, device policies, roles, groups, lessons, homework, notifications and payment operations.
 - Implemented idempotent payment completion, verified webhooks, outbox, audit trails, recovery workers and safe migrations.
 - Worked with Docker Compose, nginx and systemd, service diagnostics, backup/restore, health checks and release rollback.
- 2023

Client licensing backend

Private small-business project · ASP.NET Core / OpenAPI

 - Implemented key issuance and validation, activation states and integration with a client application.
 - Produced OpenAPI/Swagger documentation and an explicit error model so integration did not depend on ad-hoc coordination.
- 2024 — present

Creator and primary developer of Wist2

Open .NET platform for DSLs and runtimes

 - Designed the language frontend, bytecode/AIR, interpreter and CIL backend, public API and module system.
 - Maintaining semantic-parity tests, documentation, NuGet packages and compatibility across execution paths.

SKILLS

RECOGNITION

- LLVM-track technical selection

Technical selection result: 1st among 49 submissions, 5.0/5.0 and 104/104 tests on a memory-dependence analysis task.
- Olympiad and research-project results

Prize-winner of the HSE "Vysshaya Proba" Olympiad in industrial and competitive programming; highest-tier diplomas in the MEPhI Junior Research Competition in 2025 and 2026; winner of the...

EDUCATION

HSE University · Software Engineering · Faculty of Computer Science · bachelor's programme 09.03.04 · Moscow · Officially admitted; full-time studies begin in September 2026. Expected graduation: 2030.

SELECTED PROJECTS

- Subscription backend

VpnMediator / Razaltush VPN

ASP.NET Core backend for a commercial VPN service: subscriptions and entitlement, unified access delivery, Telegram UI, payment flows, device binding and Linux operations.

 - subscriptions, entitlement and device limits; HMAC of x-hwid without storing the raw hardware identifier
 - idempotent completion, outbox/audit trail, recovery workers and safe migrations
- LMS backend

CompilationLabLMS

Education platform backend with a browser BFF, an internal service and PostgreSQL as the source of truth.

 - PublicService BFF and InternalService/persistence boundary; cookie authentication, CSRF and student/teacher/admin roles.
 - Groups, lessons, enrollments, homework, notifications, chat and separate workspaces.
