

Mikhail Razakov

Compiler and Runtime Developer

Moscow / remote · razakov.misha@mail.ru · t.me/Micodiy · github.com/Misha1302
HSE University, Software Engineering, 2026-2030. Open to internship or part-time work from September 2026.

Since 2024, I have been building Wist2: lexer, parser and AST, bytecode/AIR, interpreter and CIL backend. At MCST, I implement graph algorithms in C++23.

Ranked 1st among 49 submissions; 104/104 tests in MCST selection	Wist2: Bytecode/AIR, Interpreter, CIL	C++23, C17, C#/ .NET, Linux
---	---------------------------------------	-----------------------------

Experience

MCST · Software Engineering Intern, Jul-Aug 2026

- RPO with cycle detection, Dijkstra, Dinic maximum flow and Tarjan SCC.
- CMake, .in/.out tests, -Werror, ASan/UBSan and clang-tidy.

Wist2 · Author and main developer, 2024-present

- Dialect configuration, Lexer, Parser/AST, Bytecode/AIR, optimizers, Interpreter and DynamicMethod-based CIL.
- Public API, NuGet packages, documentation, examples and equivalence tests.

Memory-dependence analyzer · C17

- Normalization, ranges, modular checks, GCD checks and exact affine cases.
- Ranked 1st among 49 submissions; 104/104 tests.

Technologies

C++23, C17, C#, Python, CMake, Git, Linux, ASan/UBSan, clang-tidy, Lexer/Parser/AST, Bytecode/AIR, IR/SSA, CIL/DynamicMethod
