Mikhail Razakov

C# / .NET BACKEND DEVELOPER

Moscow / remote · razakov.mikhail@outlook.com · Telegram · GitHub

PROFILE

I build C#/.NET backend services. In client projects in 2023–2024, I built an ASP.NET Core licensing API and supported its integration with Unity applications. In VpnMediator, my own service, I work on subscriptions, duplicate payment events and state recovery. Since October 2026, I have worked on SharpChecker at ISP RAS.

TECHNICAL SKILLS

- Backend and data: C#, .NET, ASP.NET Core, REST API, OpenAPI, EF Core, SQL, PostgreSQL, SQLite; Python
- Reliability and tooling: idempotency, background jobs, migrations, backups and deployment rollback; Git, Linux, Docker Compose, nginx, systemd

EXPERIENCE

Client software development · C#/.NET, Unity — individual projects, 2023–2024

KeyAuth: built an ASP.NET Core license-key registration and activation API with EF Core/PostgreSQL and Unity client integration. Delivered components to the client; supported authentication and addressed compatibility issues with older builds. In 2023, delivered a paid interactive Unity application with a separate display output.

ISP RAS · SharpChecker — Oct 2026 — present

Working on symbolic computation for C#/.NET static program analysis.

MCST · Compiler Engineering Internship — Jul — Aug 2026

C++23/LLVM 22: experimental LICM, conservative transformation legality checks, and Python-based before/after behavior checks.

PROJECTS

VpnMediator / Razaltush VPN · independently maintained service

Maintain the ASP.NET Core subscription, access, and device backend in a system with a Python Telegram bot and SQLite. The code implements idempotent processing of duplicate payment events, state reconciliation, operation recovery, and coordinated backups with deployment rollback.

UniversalToolchain · open-source C#/.NET project

Developing modular language infrastructure: a typed LanguagePlan validates dependencies before execution, while interpreter and CIL backends are checked for agreement between execution results.

EDUCATION AND RECOGNITION

HSE University, Faculty of Computer Science — Software Engineering, since 2026.

First-degree diploma, MEPhI Junior competition (2026, UniversalToolchain); speaker at LangDev 2026 — Official talk recording
