Mikhail Razakov

C# / .NET BACKEND · SYSTEMS & RELIABILITY

Moscow / remote · razakov.mikhail@outlook.com · Telegram · GitHub

PROFILE

I build .NET services with explicit treatment of retries, payment state, recovery and diagnosability. I operate VpnMediator and develop UniversalToolchain's plan/execution boundary. Approx. one year of aggregate commercial work across a mixed stack (candidate-reported).

TECHNICAL SKILLS

- C#/.NET, ASP.NET Core, EF Core, SQL/PostgreSQL, SQLite, REST/OpenAPI, async/await
- Idempotency, provider reconciliation, transactions and recovery; CIL, Reflection.Emit, C++/LLVM, Python, Linux

EXPERIENCE

ISP RAS · SharpChecker Oct 2026 — present

Symbolic computation and structured C# code/declaration metadata for static analysis and AI-assisted defect recognition.

MCST · compiler engineering internship Jul — Aug 2026

C++23/LLVM 22: experimental LICM with conservative legality checks; Python differential checks of before/after behavior.

Commercial development · C#/.NET & adjacent technologies approx. 1 year total

Application and backend work with C#/.NET, Unity, ASP.NET Core, SQL/PostgreSQL, file I/O and servers. Duration is candidate-reported.

PROJECTS

VpnMediator · payment is not entitlement

Separated payment/access state; order-event binding, idempotent handling, reconciliation and restart recovery. Release scripts include backups, health gates and rollback.

UniversalToolchain · plan before execution

A validated LanguagePlan captures dependencies and typed backend routes; Bytecode/AIR, interpreter/CIL. 1,324 tests are listed in repository manifests, not claimed as freshly executed.

TuringSquare-LMS · architecture and review

I define access-role invariants and T-Bank sandbox acceptance criteria. Implementation is partly agent-generated; no production release claimed.

Quark2 · CLR research

DynamicMethod/Reflection.Emit and experimental CLR internals; BenchmarkDotNet comparisons of Invoke, delegates and native pointers.

EDUCATION AND RECOGNITION

HSE University — Software Engineering.

MEPhI Junior 2026, 1st-degree diploma; LangDev 2026 UniversalToolchain talk.
