

# Mikhail Razakov

## .NET Backend Engineer

I build and support .NET services where state correctness and recovery matter: subscriptions, payments, roles, devices, OpenAPI contracts, migrations and background operations. In 2023, I delivered a client licensing backend; in 2026, I am developing a VPN service and an LMS while completing an MCST engineering internship. I have taught programming and reviewed student code since 2021.

Moscow / remote · HSE University, Software Engineering 2026–2030 · Available Sep 2026: internship / part-time · MCST Jul-Aug 2026

### 2023

client licensing backend and integration API

### 2026 — present

development, deployment and support of running services

### 2026

MCST engineering internship and 104/104 selection tests

### 2021 — present

teaching, code review and project mentoring

## EXPERIENCE

### 2026 — present

#### Independent product development and operations

VpnMediator / Razaltush VPN · CompilationLabLMS

- Designed subscriptions, access rights, device policies, roles, groups, lessons, homework, notifications and payment operations.
- Implemented idempotent payment completion, verified webhooks, outbox, audit trails, recovery workers and safe migrations.
- Worked with Docker Compose, nginx and systemd, service diagnostics, backup/restore, health checks and release rollback.
- Supported user and admin flows after launch and fixed issues visible only in the deployed environment.

### 2023

#### Client licensing backend

Private small-business project · ASP.NET Core / OpenAPI

- Implemented key issuance and validation, activation states and integration with a client application.
- Produced OpenAPI/Swagger documentation and an explicit error model so integration did not depend on ad-hoc coordination.
- Source code and client data are private.

### Jul-Aug 2026

#### Engineering internship: algorithms and C++23 infrastructure

MCST · LLVM compiler-development track · remote

- Developing algorithmic components, a shared graph model, CMake builds and reproducible tests.
- Using strict warnings, sanitizers and static analysis while keeping module dependencies controlled.

### 2024 — present

#### Creator and primary developer of Wist2

Open .NET platform for DSLs and runtimes

- Designed the language frontend, bytecode/AIR, interpreter and CIL backend, public API and module system.
- Maintaining semantic-parity tests, documentation, NuGet packages and compatibility across execution paths.

## ADDITIONAL EXPERIENCE

| <b>2026</b>           | <b>Public EdTech product support</b><br>Diploma.school     | <ul style="list-style-type: none"><li>Fixed desktop and mobile navigation, responsive regressions, content routing and Telegram integrations.</li><li>Validated changes against real user flows without breaking existing behaviour.</li></ul>               |
| <b>2021 — present</b> | <b>Programming tutor</b><br>About 50 students · 5.0 rating | <ul style="list-style-type: none"><li>Teaching C#, C/C++, Python, Unity and algorithms; reviewing code and helping with architecture and debugging.</li><li>Supporting projects through demonstration and defence, with clear completion criteria.</li></ul> |

## SELECTED PROJECTS

### SUBSCRIPTION BACKEND

#### VpnMediator / Razaltush VPN

- State & devices: subscriptions, entitlement and device limits; HMAC of x-hwid without storing the raw hardware identifier

[Public showcase](#)

### LMS BACKEND

#### CompilationLabLMS

Education platform backend with a browser BFF, an internal service and PostgreSQL as the source of truth.

- PublicService BFF and InternalService/persistence boundary; cookie authentication, CSRF and student/teacher/admin roles.

[Open LMS](#)

### CLIENT PROJECT

#### Activation key system

Backend for issuing and validating keys, license status and client-application integration. Private client project: source code and client data are not public.

- OpenAPI/Swagger documentation and an explicit error model.

## SKILLS

### Core stack

C#, .NET, ASP.NET Core, Python, C/C++, SQL

### Data & operations

PostgreSQL, SQLite, migrations, transactions, Docker/Compose, nginx, systemd, health checks, backup/restore

### Communication languages

Russian — native; English — technical documentation and written communication, with no claimed CEFR certificate.

### Backend

REST APIs, OpenAPI/Swagger, authentication and authorization, subscriptions, payments, webhooks, background recovery

### Quality

Integration smoke tests, negative paths, production contract checks, logging and rollback-ready deployment

## RECOGNITION

### 2026 · MCST

#### LLVM-track technical selection

Technical selection result: 1st among 49 submissions, 5.0/5.0 and 104/104 tests on a memory-dependence analysis task.

[Solution](#) · [Internship program](#)

### 2025-2026

#### Olympiad and research-project results

Prize-winner of the HSE “Vysshaya Proba” Olympiad in industrial and competitive programming; highest-tier diplomas in the MEPhI Junior Research Competition in 2025 and 2026; winner of the Computer Science track in the HSE “Vysshiiy Pilotazh” Research Competition.

[MEPhI Junior 2025](#) · [MEPhI Junior 2026](#)

## EDUCATION & AVAILABILITY

### 2026-2030

#### HSE University · Software Engineering

Faculty of Computer Science · bachelor's programme 09.03.04  
Moscow · officially admitted; full-time studies begin Sep 2026.

### From Sep 2026

#### Internship or part-time role

Moscow / remote

Available after the MCST summer internship. I am looking for engineering...
