

Mikhail Razakov

.NET Backend Engineer · EdTech

I have taught programming since 2021 and worked with about 50 students while continuing to build engineering products. In CompilationLabLMS, I designed roles, groups, lessons, homework, notifications, balance ledgers and payment flows; at Diploma.school, I fixed real user-facing and responsive regressions. Production backend work, client delivery, Wist2 and an MCST internship provide a broader engineering base than EdTech domain knowledge alone.

2021 — present

programming teaching and mentoring

≈50 students

individual work, code review and project support

2 EdTech products

LMS backend and public-platform support

Engineering depth

production backend, Wist2 and an MCST internship

EXPERIENCE

2021 — present

Programming tutor and mentor

About 50 students · 5.0 rating · C/C++, C#, Python and Unity

- Diagnosing knowledge gaps, teaching algorithms and architecture, selecting practice and reviewing code.
- Helping students bring projects to demonstration and defence, with measurable completion criteria and replanning when gaps appear.
- Working with different skill levels, which makes interface, instruction and feedback problems immediately visible.

2026 — present

LMS backend design

CompilationLabLMS · .NET / PostgreSQL

- Designed student, teacher and administrator roles, groups, lessons, enrolments, homework, notifications, chat and workspaces.
- Separated the browser BFF, internal business logic and storage layer, with PostgreSQL as the source of truth.
- Implemented a balance ledger, payment operations, YooKassa fast-payment flows, verified webhooks and idempotent payment completion.
- Maintained Docker Compose/nginx contracts, backups and checks for critical scenarios.

2026

Public education-platform support

Diploma.school

- Fixed desktop and mobile navigation, responsive behaviour, content routing, PDF previews and Telegram integrations.
- Iterated from real user feedback while preserving existing flows across devices.

2026 — present

Payment-service development and operations

VpnMediator / Razaltush VPN

- Worked on subscriptions, access rights, devices, payments, migrations, diagnostics and background recovery.
- This experience transfers directly to EdTech systems where balances, access and failure recovery must remain correct.

ADDITIONAL EXPERIENCE

2024 —
present

Systems and algorithmic foundation

Wist2 · MCST internship · program analysis

- Developing the Wist2 compiler/runtime platform, including public APIs, interpreter, CIL backend, tests and documentation.
- Completing an MCST engineering internship on the LLVM track, working with C++23, CMake, tests and sanitizers.

2023

Client licensing backend

Private project · ASP.NET Core / OpenAPI

- Implemented an integration API, OpenAPI/Swagger documentation and administrative flows without manual state editing.

SELECTED PROJECTS

LMS BACKEND

CompilationLabLMS

- Learning workflows: student/teacher/admin roles, groups, lessons, enrollments, homework lifecycle, materials, notifications and chat

[Open LMS](#)

PRODUCT SUPPORT

Diploma.school

Public education platform where I fixed UX regressions and responsive behavior.

- Mobile and desktop navigation, content routing, PDF/material links and Telegram integrations.

[Website](#)

TEACHING

Programming tutoring

Individual lessons in C#, C/C++, Python, Unity and algorithms for school and university students.

- About 50 students, a 5.0 rating and 10 verified reviews.

SKILLS

Backend

C#, .NET, ASP.NET Core, REST APIs, OpenAPI/Swagger, BFF/InternalService, authentication and authorization

Payments & data

PostgreSQL, SQLite, ledgers, payment orders, webhooks, reconciliation, idempotency

Communication languages

Russian — native; English — technical documentation and written communication, with no claimed CEFR certificate.

LMS domain

Groups, lessons, enrollments, homework, materials, notifications, progress and workspaces

Education

Algorithms, C/C++, C#, Python, task selection, diagnostics, mentoring and code review

RECOGNITION

2026 · MCST

LLVM-track technical selection

Technical selection result: 1st among 49 submissions, 5.0/5.0 and 104/104 tests on a memory-dependence analysis task.

2025-2026

Olympiad and research-project results

Prize-winner of the HSE “Vysshaya Proba” Olympiad in industrial and competitive programming; highest-tier diplomas in the MEPhI Junior Research Competition in 2025 and 2026; winner of the Computer Science track in the HSE “Vysshiiy Pilotazh” Research Competition.

EDUCATION & AVAILABILITY

2026-2030

HSE University · Software Engineering

Faculty of Computer Science · bachelor's programme 09.03.04
Moscow · officially admitted; full-time studies begin Sep 2026.

From Sep 2026

Internship or part-time role

Moscow / remote

Available after the MCST summer internship. I am looking for engineering...
