

Mikhail Razakov

.NET Backend Engineer

misha13022008@gmail.com · t.me/Micodiy · github.com/Misha1302

Moscow / remote
from September 2026
up to 20 h/week

I build and support .NET services where state correctness and recovery matter: subscriptions, payments, roles, devices, OpenAPI contracts, migrations and background operations. In 2023, I delivered a client licensing backend; in 2026, I am developing a VPN service and an LMS. I have taught programming and reviewed student code since 2021.

1/49

MCST technical selection; 104/104 tests

3 production cases

VPN service, LMS and activation system

C# · .NET · SQL

ASP.NET Core, PostgreSQL, Linux operations

EXPERIENCE

2026 — present

Independent product development and operations

VpnMediator / Razaltush VPN · CompilationLabLMS

- Designed subscriptions, access rights, device policies, roles, groups, lessons, homework, notifications and payment operations.
- Implemented idempotent payment completion, verified webhooks, outbox, audit trails, recovery workers and safe migrations.
- Worked with Docker Compose, nginx and systemd, service diagnostics, backup/restore, health checks and release rollback.

2023

Client licensing backend

Private small-business project · ASP.NET Core / OpenAPI

- Implemented key issuance and validation, activation states and integration with a client application.
- Produced OpenAPI/Swagger documentation and an explicit error model so integration did not depend on ad-hoc coordination.

2024 — present

Creator and primary developer of Wist2

Open .NET platform for DSLs and runtimes

- Designed the language frontend, bytecode/AIR, interpreter and CIL backend, public API and module system.
- Maintaining semantic-parity tests, documentation, NuGet packages and compatibility across execution paths.

SKILLS

RECOGNITION

LLVM-track technical selection

Technical selection result: 1st among 49 submissions, 5.0/5.0 and 104/104 tests on a memory-dependence analysis task.

Olympiad and research-project results

Prize-winner of the HSE "Vysshaya Proba" Olympiad in industrial and competitive programming; highest-tier diplomas in the MEPhI Junior Research Competition in 2025 and 2026; winner of the...

EDUCATION

HSE University student

SELECTED PROJECTS

Subscription backend

VpnMediator / Razaltush VPN

ASP.NET Core backend for a commercial VPN service: subscriptions and entitlement, unified access delivery, Telegram UI, payment flows, device binding and Linux operations.

- subscriptions, entitlement and device limits; HMAC of x-hwid without storing the raw hardware identifier
- idempotent completion, outbox/audit trail, recovery workers and safe migrations

LMS backend

CompilationLabLMS

Education platform backend with a browser BFF, an internal service and PostgreSQL as the source of truth.

- PublicService BFF and InternalService/persistence boundary; cookie authentication, CSRF and student/teacher/admin roles.
- Groups, lessons, enrollments, homework, notifications, chat and separate workspaces.
