

I have taught programming since 2021 and worked with about 50 students while continuing to build engineering products. In CompilationLabLMS, I designed roles, groups, lessons, homework, notifications, balance ledgers and payment flows; at Diploma.school, I fixed real user-facing and responsive regressions. Backend and operations work helps me connect learning workflows to correct system state.

2021 — present

groups, lessons, homework and payments

≈50 students

hands-on teaching and mentoring

EXPERIENCE

2021 — present

Programming tutor and mentor

About 50 students · 5.0 rating · C/C++, C#, Python and Unity

- Diagnosing knowledge gaps, teaching algorithms and architecture, selecting practice and reviewing code.
- Helping students bring projects to demonstration and defence, with measurable completion criteria and replanning when gaps appear.
- Working with different skill levels, which makes interface, instruction and feedback problems immediately visible.

2026 — present

LMS backend design

CompilationLabLMS · .NET / PostgreSQL

- Designed student, teacher and administrator roles, groups, lessons, enrolments, homework, notifications, chat and workspaces.
- Separated the browser BFF, internal business logic and storage layer, with PostgreSQL as the source of truth.

2026

Public education-platform support

Diploma.school

- Fixed desktop and mobile navigation, responsive behaviour, content routing, PDF previews and Telegram integrations.
- Iterated from real user feedback while preserving existing flows across devices.

SKILLS

RECOGNITION

LLVM-track technical selection

Technical selection result: 1st among 49 submissions, 5.0/5.0 and 104/104 tests on a memory-dependence analysis task.

Olympiad and research-project results

Prize-winner of the HSE "Vysshaya Proba" Olympiad in industrial and competitive programming; highest-tier diplomas in the MEPhI Junior Research Competition in 2025 and 2026; winner of the...

SELECTED PROJECTS

LMS backend

CompilationLabLMS

Education platform backend with a browser BFF, InternalService and PostgreSQL as the source of truth.

- student/teacher/admin roles, groups, lessons, enrollments, homework lifecycle, materials, notifications and chat
- coin ledger, payment orders, YooKassa SBP, verified webhooks, refunds/reconciliation and idempotent completion

Product support

Diploma.school

Public education platform where I fixed UX regressions and responsive behavior.

- Mobile and desktop navigation, content routing, PDF/material links and Telegram integrations.
- Iterations based on real feedback without breaking user flows.
